

Are you still suffering from outages and business loss due to unreliable connections?

With Dialog National Connect, you can now connect your business in cities and remote locations across the island, with a fully managed point-to-point or point-to-multi point highly secured network service.

Dialog National Connect is a layer 3/layer 2 VPN product offered using the Dialog MPLS core network with last mile access via fibre or high performance wireless technologies such as LTE, Cambium or WiBAS. You can have a fully converged network capable of delivering their data, voice and video traffic efficiently by prioritising traffic using class of service.

Dialog can provide dual links primary / backup model or active/active mode using two Dialog access links or other operator links to provide high availability. In this case, dynamic routing will be configured in the router.

Specifications

Topology	Network Layer	Technology	Bandwidth Availability	Service Level Agreements
Point-to-point	Layer 2	Multi- Protocol Label Switching (MPLS)	64Kbps to 10Gbps	Up to 99.95%
Point-to-Multipoint	Layer 3			

Dialog National Connect

Expand your reach, liberate your business.

Benefits

- Improved business agility with scalable network solutions
- Cost-effective connectivity across the nation
- Provision of any service over
- High data security
- Dedicated bandwidth
- High availability over 99.9% on Dialog networks
- Quick provisioning of service
- Fully managed end-to-end solutions
- Class of service
- Monitored through a network management system supervised by a team of specialists
- 24x7 Network/Service Operation Centres

The Dialog Advantage

Dialog National Connect covers the country through a network of fibre optics, high capacity low latency microwave and LTE. Dialog brings its extensive expertise in planning national networks and combines it with possibly the largest end-to-end (E2E) internet protocol (IP) based networks, resulting in unsurpassed reliability and resiliency. Our group of experts will customise a tailored solution based on your requirements, backed by industry leading Service Level Agreements support.
