

# Dialog Mobile Surveillance

Dialog Enterprise brings you a state-of-the-art, hassle-free, software-based mobile video surveillance solution to fulfill the body-worn camera requirement of the enterprise market in Sri Lanka.

This hassle-free, software-based video surveillance which acts as a substitute body camera solution comes with no special hardware unit, making it extremely user friendly to those operating it.

The authorized users can install an end-point secured mobile application on their smart phones and start live streaming during any required situation. This cost effective solution further ensures data security with a central point of storage whilst also giving real-time data visibility to the authorities.

## Features

Secured Mobile Application
