EventTags

EventTags mobile app comes to light under the efforts of Dialog Enterprise, to introduce mobile applications to manage community gatherings smartly and communicate more efficiently while ensuring the security aspect of such events. On the other hand, apps of this technical calibre are instrumental in furthering the required precision and agility of the processes.

With the launch of EventTags, event management professionals are able to assign ever increasing critical workloads to EventTags to avoid complexities and considerable lagging areas. All in all, users of the app will be informed of the exact number of attendees for the event and be able to arrange other facilities accordingly, avoiding wastage and ensuring efficient time management.

Product Features

Make your event an experience for your event attendees with a digital environment. A feature packed digital platform with a web-based management console and Mobile app.
